

# Manual/Automatic Transfer Switch – MATS004R

The MATS004R is a dependable power transfer and bypass switch. It ensures continuous power to equipment and eliminates operation downtime.

The MATS004R switches load to mains supply in the case of UPS output fault and also permits manual bypass of the UPS to facilitate servicing. It is available in 230VAC and 110VAC and contains relay contacts for status monitoring rated at 5A.

## Some key features include:

- Continuous power to equipment
- Eliminates operation downtime
- Switch load to mains power in case of UPS fault
- Available in 230V<sub>AC</sub> and 110V<sub>AC</sub>
- Mains terminal 25mm, alarm terminal 4mm
- Alarm contacts for status monitoring

## Product Specifications
